Key Capabilities:

Automate and ensure compliance for the verification process

Reduce stress on staff for compliance issues

Support multi-award year selection and review

Streamline mobile student experiences

Verification review and approval, comment codes and professional judgements

Built-in comparison and verification to enable ISIR review

Help your staff help your students

Reduce operation costs by streamlining the financial aid verification
process for staff with real-time dashboards, automated document
storage and dynamic document requirement triggers.

Motivate your students to focus on their studies

With a secure student portal, real-time status bar and convenient
communications through email and text, your students benefit
from an easy process so they can keep their attention on tackling
their coursework.

Financially sound students stick around

By improving the financial aid process you're helping improve student
retention. Students quickly gain access to their aid, enabling them to
pay for books and fees and stay on top of coursework.

Meet all your regulatory requirements

Take comfort in knowing our product is ED compliant, enables C-flags
and comment codes as part of the rules engine and provides an audit
trail for all activities.
